Rapid Improvement Consultation to Drive Utilization Savings in Just 18-months

\$6,000 / bed

Average Blue.Point Savings

Program Details:

Rapid Improvement Consultation (RIC) offers a structured approach to implement evidence-based product utilization initiatives to reduce costs and improve patient care.

Benefits include:

- **Detailed savings opportunities:**
 - Action plans with SKU/department level details outlined for savings implementation.
 - Analytics provided at the beginning of the project, midway, and at completion, to track savings progression.
- **Kickoff meeting** to present custom savings report.
- **Monthly clinical support:** 1 hour/month included.
- **Analytics custom reports** and increased clinical assistance available (additional fees apply).
- **Access to OR, Nursing, and Ancillary portfolios**, plus Blue.Point's fully referenced clinical library.

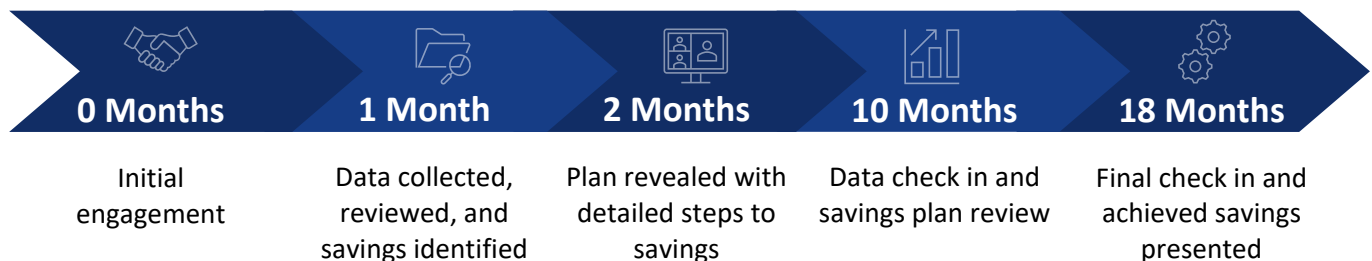

Why Partner with Blue.Point?

Through the 18-month Rapid Improvement Consultation, Blue.Point offers flexible access to the analytics and actions plans that will drive utilization savings.

Our strengths include:

- Clinical data analytics with a specific focus and expertise in optimizing supply utilization.
- A superior level of healthcare supply chain experience in clinical and analytical roles.
- Clinical research to align utilization opportunities with evidence-based practice.
- A customer-centric approach that provides clear guidance to operationalize changes and realize savings.
