

Blue.Point Supply Utilization Process Flow Map

Key milestones guide savings identification to implementation

Savings Identification Discovery Phase

- Review Top 10 on the home Dashboard
- Review all opportunities in the Target Savings report
- Does any BP Study align to a large conversion or high spend category of concern (i.e. safety)

Data Collection Information Gathering Phase

- Gather the following category data in the platform: Clinical Research, Category Data, and Action Items
- Identify stakeholders related to category

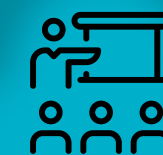

Analysis & Planning Development Phase

- Review Action Items: compare to Top Performers and, if IDN, compare across IDN
- Address outliers relating to Best Practice text
- Review Clinical Overview for Questions to Ask, Action Items, and conflicting evidence
- Review data by Product Type: Look for variation by features and manufacturers.
- Review from a department perspective
- Identify key next steps and champions

Project Initiation Execution Phase

- Gather internal and external educational resources
- Identify key practice and product changes
- Amend policy and / or protocols
- Update MMIS, EHR, etc

Track and Trend Monitoring Phase

- Identify who, what and when KPIs will be tracked
- Ensure changes occurred in both product and practice
- Reinforce education, if needed
